Calculations: Units of Measurement
curated by the Western Cast Iron Art Alliance (wciaa.org)

The Western Cast Iron Art Alliance (wciaa.org) selected visual responses incorporating Fe that depict the ways we quantify and calculate to comprehend our place in the world. Mixed media works that explore mathematics, furnace dimensions, postal fees, shipping weight, ancestry, metric, imperial, hand-span, clothing sizes, climate change, statistics, currency, interstellar/ microscopic distances... and related matters. It seems our entire society is based on units of measurement, from the founding of science to the organization of time.

Artists:
